

MAXIMA ACID TOILET DESCALER MAX10303

DESCRIPTION AND APPLICATION INSTRUCTIONS

For toilets and urinals.

Contains strong mineral acids which will remove limescale and staining from ceramic surfaces.

Contains biodegradable surfactants for effective penetration and a rust inhibitor for maximum protection.

Is viscous and will cling to inclined and vertical surfaces.

To clean ceramic toilet bowls and urinals, squirt a small quantity along the top of the area to be cleaned.

The liquid will run down over the surface, covering it completely. After a few minutes, brush vigorously and rinse with water.

N.B. Do not use on enamel, chrome, stainless steel, marble, terrazzo, stone, linoleum, plastic floors etc.

ALL EQUIPMENT USED SHOULD BE ACID RESISTANT.
